VEGAN MARATHONER WINS NORTH POLE WOMAN'S RACE AND SETS COURSE RECORD

BY MATTHEW LOBAS

Wednesday 10 April, 2013

On 9 April vegan amateur athlete Fiona Oakes, 43, from Asheldham in Essex, won the women's race in the North Pole Marathon in -28°C. Not only did Fiona win the women's marathon but she also smashed the 2008 course record for women by 44 minutes – completing the race in just 4 hours and 53 minutes – despite the conditions that were described as the worst in the marathon's eight year history. Fiona was beaten by only two male marathoners. The second placed woman was 55 minutes behind Fiona's time.

On her Facebook page after the race Fiona wrote "Back in Spitsbergen. Job done! It is so cold and brutal in the Arctic I cannot explain. Marathon + Arctic conditions = TOUGH! I knew it was going to be bad but just how bad I couldn't possibly have prepared for. Not just the consequences of running at -30 with a wind chill but for half the course through deep snow. I haven't got the longest legs in the world and kept falling it was so deep as when you put your foot on it you didn't know if it was frozen enough to take your weight. On one occasion I sank up to my groin, on another I fell on my hand and now have a suspected fractured thumb. [...] Never mind, job done, win in the women's race, new course record and 3rd overall. Can't ask for any more."

The North Pole Marathon is the northernmost marathon on earth and Fiona faced this extreme challenge to raise funds for the The Vegan Society and to support the 400 animals that she personally cares for every day at her Tower Hill Stables Animal Sanctuary. An Honorary Patron of the Vegan Society, Fiona Oakes has competed in more than 26 marathons. She has gained top 20 places overall in two of the world's Major Marathon Series - Berlin and London - as well as the Great North Run where she was the first woman to complete the race from the masses in 2010. Last April she became the first vegan woman - and one of a tiny number of women ever - to complete the grueling Marathon de Sables, often described as 'the toughest race on earth'. The race involves competitors running seven marathons in six days – at total of 154 miles - across the Sahara Desert in Morocco carrying all their own supplies for the week with only temporary shelter and water provided. Temperatures often reach in excess of 45 degrees.

What makes Fiona's achievement even more impressive is that she has achieved such success despite having a severe injury to her left knee, incurred when she was a teenager that left her with no knee cap. When she runs she is in constant pain due to the running style she has to adopt. After her operations she was told that walking normally would be difficult and running near impossible.

Fiona aims to be the first vegan to run a marathon on all seven continents plus the polar ice cap. She is well on her way to her target: in November she will take on the Volcano Marathon in the Atacama Desert the week before tackling the Antarctic Marathon, all in aid of the same charities.

Vegan Society CEO, Jasmijn de Boo, was delighted to hear the news of Fiona's success in the North Pole: "I believe that Fiona is a true inspiration to anyone, including runners, women, vegans and non-vegans, and above all, humanity. She shows what the values of dedication, commitment, discipline and staying cheerful in the face of hardship really mean."

Cloud & Big Data

Come to New York and get yourself up to date with the Big Data revolution! As advanced data storage, access and analytics technologies aimed at handling high-volume and/or fast moving data all move center stage, aided by the Cloud Computing boom, Cloud Expo is the single most effective event for you to learn how to use you own enterprise data – processed in the Cloud – most effectively to drive value for your business.

There is little doubt that Big Data solutions will have an increasing role in the Enterprise IT mainstream over time. Get a jump on that rapidly evolving trend at Big Data Expo, which we are introducing in November at Cloud Expo New York.

"Cloud" has become synonymous with "computing" and "software" in two short years. Cloud Expo is the new PC Expo, Comdex, and InternetWorld of our decade. By 2012, more than 50,000 delegates per year will participate in Cloud Expo worldwide.

The cloud is certainly a compelling alternative to running all applications within a traditional corporate data center. But moving from theory into practice is where things get complicated, and this is where attending a top industry event like Cloud Expo comes in.

No one can take full advantage of cloud computing without first becoming familiar with the latest issues and trends, which is why the organizing principle of the 10th International Cloud Expo on June 10-12, 2014 - is to ensure - through an intensive three-day schedule of keynotes, general and breakout sessions, and our bustling Expo Floor - that attending delegates leave the Javits Center with abundant resources, ideas and examples they can apply immediately to leveraging the Cloud, helping them to maximize performance, minimize cost and improve the scalability of their Enterprise IT endeavors.

Delegates will leave Cloud Expo with dramatically increased understanding the entire scope of the entire cloud computing spectrum from storage to security.

Whether you're an enterprise or small to medium business, you'll soon be benefiting from the Cloud. Join your peers in New York June 10-12, and maximize those benefits already in 2014. See you in New York!
